

Norsk Korrosjonsteknisk Forening Stavanger

ATLANTIC HOTELL
Onsdag 04.03.2009
19.00-21.30

Kveldens sponsor: CAN Technology AS

CAN Technology AS er et selskap som spesialiserer seg på leveranse av industrielle coatinger og korrosjonsprodukter. Selskapet promoterer hele produktspekteret fra UK-baserte Belzona Polymeric, som er en global produsent og leverandør av polymeriske reparasjonsprodukter.

Program:

- 19.00 – 19.10 Velkommen og informasjon
- 19:10 – 19.50 ***The next Generation of Belzona High Temperature Internal Vessel Linings:***
Belzona 1391S, a low amine spray grade of the very successful hand applied Belzona 1391, which has demonstrated in excess of 10 years corrosion and erosion resistance. Providing leading edge technology in chemical resistance, in a fast, effective and simple application. Proven across the globe in 2007, applied to over 200 vessels for many major, supermajor and national/international oil companies.
Presentert av Colin Bateman, Belzona Polymeric LTD.
- 19.50 – 20.20 Kaffepause med enkel servering.
- 20.20 – 20.35 Sponsors kvarter.
- 20.35 – 21.30 ***Belzona Surface Corrosion Solutions and Code Compliant Repairs:***
Surface tolerant, high performance barrier coatings offering on-line application from 20°C to 150°C for CUI protection, which have been proving themselves over the past decade with many global oil companies not only saving significant application time and money over for example TSA, but also longevity in service, protecting assets from reoccurring CUI. Also introducing SuperWrap, a code compliant composite repair system for corroded or pitted areas, thin wall or through wall defects.
Presentert av James Malcolm, Belzona Polymeric LTD.
- 21.30 – Forfriskninger.

Gratis for medlemmer, 50 NOK for andre.

For styret: Torfinn Havn
